

SanaUllah Mansha

PCHS Lahore, Pakistan | sanaullahmansha248@gmail.com | 03043342805

Professional Summary

- 4 years of experience in database **Administration and database development**
- Provided consultancy with a focus on technical design, migrations, integrations, solution, deployments and operations.
- Installation, patch /release upgradation of SQL Server, Postgres and MySQL.
- Updating existing procedures and changing management.
- Deploying different database objects on different local dev and test environments.
- Database maintenance, backups & restore DB, job handling etc.
- Performance optimization
- Server Migration

Technologies & Skill

- MSSQL Server 2012,2016,2019
- Database Design
- Structured Query language DDL/DML/DRL/TCL/DCL/CONSTRAINTS
- Tables/stored Procedures/Views/Functions/Triggers Performance Optimization/Tuning
- Indexing
- Unit testing
- SSRS
- SSIS
- Grafana, Prometheus
- Knowledge of data warehousing, OLAP, OLTP
- PostgreSQL
- MySQL
- Installation of PostgreSQL, SQL, ORACLE
- Structural Query Language SQL
- Index Maintenance
- Server installation, patch update and recovery.
- Database maintenance, backups & restore DB, jobs handling etc.
- Index Maintenance
- Database Administration
- Always ON
- WFCI
- HADR

- Replication
- Performance analysis and query optimization
- Server Migration
- Writing complex procedures & function
- Implementing Indexes
- Performing and tuning of queries
- Immediate and efficient client support
- Handle Database design.
- Cloud knowledge Azure and AWS
- knowledge Azure pipeline CICD
- Windows, Linux/Unix,

Professional Experience:

***Company: Calrom (from 21 Aug 2023) continue
Database Administrator***

Responsibilities:

- Installation and configuration of SQL server on windows.
- Managing and administering the databases.
- Handle the database backup and restore tasks. (Full, Incremental, Transaction logs).
- Prepare health check scripts for database.
- Create users in database. (Grant, Lock and unlock users).
- Create Users at database Level, also assign different roles at DB level.
- Rebuilding the indexes to remove fragmentation from indexes and boosting performance.
- Creating and Monitoring the Jobs through SQL Job Agent
- Troubleshoot and resolve production problems related to databases.
- Monitoring Databases using Grafana.
- Grafana Prometheus

Company: Systems limited (6 December 2021 to 18 Aug 2023)

Project: PLRA

Responsibilities:

- Installation and configuration of SQL server on windows and Linux OS.
- Managing and administering the databases.
- Handle the database backup and restore tasks. (Full, Incremental, Transaction logs).
- Implement the Transparent data encryption (TDE) at database level.
- Prepare health check scripts for database.
- Create users in database. (Grant, Lock and unlock users).
- Create Users at database Level, also assign different roles at DB level.
- worked on Change Data Capture (CDC) to track the changes in data at Table level.
- Rebuilding the indexes to remove fragmentation from indexes and boosting performance.
- Creating and Monitoring the Jobs through SQL Job Agent
- Configuring log shipping and transaction level replication.
- Troubleshoot and resolve production problems related to databases.
- Database services start and stop.
- Creating Database snapshot.
- Data fixes

Project: ELGEN

Responsibilities:

- Query writing and query optimization.
- Resolve performance issues.
- Backups and restore databases.
- Resolve deadlock issues with Database/Servers on a timely basis.
- Migrations
- Data Archiving
- Data purging
- Create Users and assign different roles and permissions.
- Monitoring the Jobs through SQL Job Agent

Project: NEJ.inc

Responsibilities:

- Data Integrations, SSIS Packages, development maintenance.
- Extracting, Transforming, and Loading data from different sources into database.
- Creating and Monitoring the Jobs through SQL Job Agent
- Develop SSIS Packages using control flow task such as Download File from FTP to local Drive and Sent File to Client Through SSIS Send Mail Task

Project: kent

Responsibilities:

- Motoring database
- Stat gathering and check error logs.
- Review the metrics on RDS
- Fragmentation of tables
- Optimization

Project: Yhata

Responsibilities:

- Handle the database backup and restore tasks. (Full, Incremental, Transaction logs).
- Implement the Transparent data encryption (TDE) at database level.
- Prepare health check scripts for database.
- Create users in database. (Grant, Lock and unlock users).
- Create Users at database Level, also assign different roles at DB level.
- Rebuilding the indexes to remove fragmentation from indexes and boosting performance.
- Creating and Monitoring the Jobs through SQL Job Agent
- Configuring log shipping and transaction level replication.
- Troubleshoot and resolve production problems related to databases.
- Database services start and stop.
- Creating Database snapshot. Applying business logic with the help of different constructs.

Project: 1Link

Responsibilities:

- Schema Migration
- WFC
- HADR
- Installation of Sql server

Company: Mentorment (May 2021 20 Nov 2021)

Database Developer

Responsibilities:

- Schema Migration
- Database design
- Structured Query language DDL/DML/DRL/TCL/DCL/CONSTRAINTS
- Inline-Query/Sub-Query/Dynamic Query Creation/Correlated Sub-Query
- Database Objects Creation

Company: Raaziq International (Pvt) Ltd (10 Oct 2020 Feb 2021)

Database Developer

Responsibilities:

- Schema Migration
- Handle Database design.
- Structured Query language DDL/DML/DRL/TCL/DCL/CONSTRAINTS
- Inline-Query/Sub-Query/Dynamic Query Creation/Correlated Sub-Query Database Objects Creation
- Tables/stored Procedures/Views/Functions/Triggers Performance Optimization/Tuning
- Indexing
- Unit testing

Microsoft Certification

- Dp-900(Data fundamental)
- Az900 (Azure fundamental)

Education

BSCS (2017-2021) Lahore Garrison University
