PROFILE SUMMARY

Java Developer with 2+ years of experience, specializing in Java and Spring Boot for building scalable REST APIs and microservices. Strong in backend development, debugging, and performance optimization, with hands-on involvement in production support and stable releases. Familiar with Kafka, Docker, and Azure services such as Blob.

WORK EXPERIENCE

Jan 2023 – Present

Software Enginner

Netsol Technologies , Lahore

- Contributed to development, bug fixing, and maintenance of RoleFit and AutoBid, ensuring reliable and smooth application performance.
 - Collaborated with cross-functional teams to troubleshoot issues and improve system stability.
 - Developed scalable backend services using Spring Boot, Hibernate/JPA, Redis, Kafka, and Docker.
 - Integrated AWS S3 for media storage and supported basic DevOps task like cors.
-

SKILL

Technical Skills

Languages: SQL, Java

Backend: Java, Spring Boot, Hibernate/JPA, Spring JDBC, REST APIs, Redis, Apache Kafka

Tools: Git,GitBash, Jira, Postman, Swagger, VS Code, IntelliJ IDEA, FileZilla, PowerShell

Soft Skills: Leadership,Team Collaboration, Communication, Adaptability, Problem Solving

EDUCATION

Bachelor of Science in Computer Science

2018 – 2023

UNIVERSITY OF CENTRAL PUNJAB ,LAHORE

PROJECTS

ROLEFIT AI – AI-Powered Hiring Solution

- Collaborated within a team to design and develop RoleFit, an AI-powered CV shortlisting platform aimed at streamlining HR recruitment processes.
- Built and maintained the backend using Java Spring Boot, handling authentication, authorization, and complete user management via AWS Cognito.
- Implemented functionality to upload and manage large volumes of CVs, securely storing documents in AWS S3.
- Integrated AI-powered CV analysis by invoking FastAPI-based AI services, enabling automated CV screening based on job descriptions, required skills, and experience criteria.
- Defined and applied predefined evaluation rules and scoring logic to filter and shortlist relevant candidates efficiently.

AUTOBID – AI-Powered RFP Builder

- Developed a collaborative RFP management system enabling users to upload RFP documents and extract questions from Excel files.
- Implemented backend logic to store and manage RFP questions and answers securely on a per-user basis.
- Designed role-based access and collaboration, allowing multiple users to contribute to and manage the same RFP.
- Integrated AI-driven automation to auto-fill RFP responses using previously stored data, reducing manual effort.
- Built a frontend interface to view, track, and manage all RFPs, including completed and in-progress submissions.

SAWA – Ride-Hailing Application

- Developed an intuitive web-based admin dashboard, improving operational efficiency for ride-hailing services.
 - Streamlined backend API communication by configuring gateway services for optimal data transfer.
-
