WORK EXPERIENCE

DATA ENGINEER – THE INSIGHTFUL SOLUTIONS – 11/2024 – 05/2026 – LAHORE, PAKISTAN

- Built ETL pipelines using Azure Data Factory, Azure Databricks, Azure Synapse Analytics, and Microsoft Fabric.
- Developed PySpark and Spark SQL notebooks for data transformation, validation, and reporting.
- Created Power BI dashboards using semantic models, DAX, Power Query, and Fabric Direct Lake connectivity.
- Integrated data from 23+ APIs, GA4, SQL, and BigQuery into centralized reporting solutions.
- Automated transformation of semi-structured JSON data into analytics-ready datasets for Power BI reporting.
- Managed deployments and source control using Azure DevOps.

PYTHON DEVELOPER – FREELANCE UPWORK – 2023 – 2024

Email Navigator: Built an automated email retrieval and sending tool using Python. Integrated GetProspect API for lead generation and TurboSMTP API for email dispatch, with a Streamlit-based UI for real-time contact search.

CrewAI Multi-Agent System: Developed a multi-agent system where agents collaborate to research topics, generate articles, and create social media posts. Leveraged AI agents to streamline content creation processes from research to publication.

EDUCATION AND TRAINING

27/08/2019 – 27/08/2023 Mardan, Pakistan
BACHELOR OF TELECOMMUNICATION ENGINEERING University OF Engineering And Technology

LANGUAGE SKILLS

Other language(s): **ENGLISH** | **URDU**

SKILLS

programming: Python, MATLAB and SQL | Data Science | Data Collection, Data Processing, Data Analysis, Data Visualisation | SQL query | GIT version control, Linux Command | IDE: Visual Studio, Pycharm, Jupyter Notebook | pandas, numpy | Power BI | Experience with ETL tools (e.g., Informatica)

CERTIFICATES

07/11/2022 – 08/03/2023
AI Programming with Python- KPITB

- Developed a strong foundation in Python programming specifically tailored for AI applications.
- Acquired practical skills in implementing machine learning and deep learning algorithms using Python libraries such as TensorFlow and sci-kit-learn. Enhanced understanding of essential mathematical concepts.

02/12/2021 – 02/2022
Programming Essentials in Python

- Sengthened proficiency in writing clean, efficient, and maintainable Python code.
- Gained practical experience in leveraging Python's powerful features and libraries to solve real-world problems.
