Profile

Technology and digital transformation professional with 6+ years of experience in software delivery, AI-enabled healthcare systems, and Agile project leadership. Proven ability to lead cross-functional teams of 70+ professionals, manage international stakeholders, and deliver enterprise-scale digital solutions with measurable business impact. Experienced in AI integration, process automation, and large-scale system optimization, including achieving 60% cost reduction and 70% user adoption in enterprise healthcare platforms serving US-based clients.

60% lower operating costs · 70% daily active usage · 40% better delivery predictability · 98% stakeholder satisfaction

Core Strengths

- Digital Transformation & Enterprise Systems
- AI-enabled Product & Process Automation
- Agile / Scrum / Hybrid Project Delivery
- Cross-functional Team Leadership (70+ members)
- Stakeholder & Client Management (International)
- Program & Project Execution
- Process Optimization & Delivery Governance
- KPI & Performance Management
- Risk, Dependency & Change Management
- Executive Reporting & Decision Support

Experience

Nov 2024 – Present
Medcare MSO

Assistant Project Manager

- Lead cross-functional delivery teams of 70+ professionals, including developers, QA engineers, business analysts, designers, and database specialists for enterprise healthcare systems.
- Manage end-to-end delivery of an AI-enabled Electronic Health Record (EHR) and Practice Management System (PMS) for US-based clients.
- Achieved a **60% reduction in operational costs** by moving from external vendor systems to scalable in-house platforms.
- Integrated AI-based solutions including AI Scribe, chatbots, and automation bots to improve workflow efficiency and reduce manual effort.
- Implemented structured Agile delivery frameworks using Jira, Azure DevOps, and ClickUp to improve sprint execution, transparency, and delivery predictability.
- Provide executive-level reporting and insights to the CTO, CEO, and senior leadership for strategic decision-making.
- Increased system adoption to **70% daily active usage** through performance optimization and user-centric improvements.

Sep 2021 – Nov 2024
Medcare MSO

Scrum Master

- Facilitated Agile ceremonies across multiple software teams, improving delivery predictability by **40%**.
- Introduced structured delivery tracking dashboards using Azure DevOps for improved visibility.
- Reduced cross-team dependencies by **20%** through improved coordination and planning frameworks.
- Supported roadmap execution, backlog refinement, and sprint planning for enterprise healthcare products.
- Contributed to Agile transformation initiatives and process standardization across departments.

Nov 2023 – Jan 2024
Powerhouse

Junior Project Manager (Part Time)

- Supported sprint execution, release planning, and backlog prioritization for software development teams.
- Developed KPI dashboards and performance tracking reports for management decision-making.
- Strengthened cross-functional collaboration between development, QA, and product teams.

Dec 2020 – Jul 2021
HospitALL by NETSOL

Project Coordinator

- Coordinated project schedules, resources, QA cycles, and delivery milestones for healthcare software solutions.
- Maintained PMO documentation, governance processes, and reporting standards.
- Achieved **98% stakeholder satisfaction** through proactive communication and coordination support.

Internship
Global Tek Soft

Software Development Intern

- Assisted in software development and testing cycles for enterprise applications.
- Documented APIs, technical workflows, and system processes.
- Supported version control and collaborative development using Git-based systems.
