

SALMAN ASLAM

Senior QA Engineer | Manual & Automated Testing | API & Browser Testing | Regulated Environments

Lahore, Punjab, Pakistan | +92-301-7762138 | salmanaslam1511@gmail.com | linkedin.com/in/salmanaslamcs

PROFESSIONAL SUMMARY

Senior QA Engineer with 5+ years of experience testing web and mobile applications end to end, from initiation through release. I have strong hands-on experience in defect management and incident analysis, and practical exposure to test automation using Playwright, Java, and working knowledge of Python and JavaScript. I test web applications across browsers, including API testing (Postman) and browser developer tools for debugging, and I'm comfortable working within structured test and defect management processes (Jira). Most of my experience comes from US Healthcare RCM, a regulated, compliance-driven environment involving EDI transactions, HL7 integration, and HIPAA requirements, including building a real-time chat support system for secure communication between patients and doctors. I'm currently working toward ISTQB certification. I'm fluent in English, detail-oriented, and used to working in distributed Agile teams, raising risks early and following issues through to resolution.

CORE COMPETENCIES

Manual & Automated QA, Full STLC (Initiation through Release), Test Automation & CI/CD Integration, Test Planning & Test Case Design, Defect & Incident Management, Root Cause Analysis, Browser & Cross-Browser Testing, API Testing (REST, SOAP & GraphQL), Browser Developer Tools, Performance & Load Testing, SQL Database Testing, Regulated/Compliance-Driven Environments, Regression/Integration/UAT Testing, Agile Scrum, QA Documentation & Reporting

TECHNICAL SKILLS

QA & Testing: Manual Testing, Test Case Design, Browser & Cross-Browser Testing, Browser Developer Tools (Chrome DevTools, network/console debugging), API Testing (Postman, SoapUI), REST/SOAP/GraphQL Validation, SQL Backend Testing, Performance/Load/Stress Testing, Regression Testing, Integration Testing, UAT, Defect & Incident Management

Automation: Java 17, Playwright, Python (working knowledge), JavaScript (working knowledge)

Databases: SQL, data accuracy and consistency validation

APIs & Data Formats: RESTful, SOAP & GraphQL APIs, JSON, XML, WSDL, YAML, HTTP methods and status codes, authentication and authorization testing

US Healthcare Domain: Revenue Cycle Management (RCM), Practice Management Systems, Claim Scrubbing & Claim Lifecycle Management, EOB/ERA, EDI (837/835/270/271), HL7 Integration, LCD/NCD Guidelines, NCCI/MUE Edits, Medicare Compliance, HIPAA

DevOps & Tools: Git, GitHub, GitHub Actions, Jira, Jenkins, Power BI

Methodologies: Agile Scrum, SDLC/STLC, Test Strategy & Architecture, Cross-Browser Testing

Languages: English, fluent and professional working proficiency

Certifications: ISTQB Foundation Level, in progress

PROFESSIONAL EXPERIENCE

Medcare MSO, Senior SQA Engineer

Jun 2021 to Present

Stack: Java, Python, JavaScript, Playwright, SQL, Jenkins, REST/SOAP/GraphQL APIs, Postman, SoapUI, JMeter

- Own and maintain an end-to-end test automation framework covering UI, API, and backend layers, and design structured test cases for functional and regression testing.
- Designed and helped build a real-time chat support system for secure, reliable communication between patients and doctors, testing message delivery, session handling, and data privacy across the platform.
- Mentor junior QA engineers on test case design, API testing methodology, and automation best practices.
- Write advanced SQL queries to validate data transformations, application state, and data accuracy across production systems.
- Test REST, SOAP, and GraphQL APIs using Postman and SoapUI, and run performance and load testing with JMeter to check response times and system stability.

- Perform browser and cross-browser testing using browser developer tools to debug network requests, console errors, and front-end issues during manual testing.
- Integrate automated regression suites into CI/CD pipelines, which has cut down manual QA effort and regression cycle time.
- Investigate recurring integration issues (data collisions, race conditions, duplicate records, unmapped codes) across distributed systems and write clear defect reports with reproduction steps and severity classification.
- Apply my US Healthcare RCM knowledge (claim scrubbing, EOB/ERA, EDI 837/835/270/271, HL7, LCD/NCD guidelines, NCCI/MUE edits) to validate billing accuracy and compliance across payer types.
- Work closely with developers and product owners in Agile ceremonies to define acceptance criteria and refine test coverage.

EDUCATION

Masters in Computer Science, MSCS, 2021

Khwaja Fareed University of Engineering and IT, Rahim Yar Khan, Pakistan

Bachelor in Computer Science, BSCS, 2019

Islamia University, Bahawalpur, Pakistan
