

AIZAZ SHABBIR KHAN

SENIOR DATABASE ADMINISTRATOR | ETL DATA ENGINEER

Senior Database Administrator and ETL Engineer with 3+ years of experience across SQL Server, Oracle, MySQL, PostgreSQL and MongoDB. Specialized in **ETL pipelines (SSIS, Python, CCD/XML/CSV)**, **AI-powered ETL automation (INT HSI AI Analyzer, GPT API agentic workflows)**, cross-platform data migrations, performance tuning and end-to-end database administration for healthcare and enterprise clients.

EXPERIENCE

Senior Database Developer & Administrator (ETL Data Engineer)

Mar 2023 – Present

CureMD — Lahore

- Install, configure and administer **SQL Server** on Windows across environments.
- Manage **backup & restore** strategy: full, incremental and transaction-log backups.
- Configure **High Availability & Disaster Recovery (HADR)**: Always On Availability Groups, Windows Failover Clustering (WFCI), log shipping and transaction-level replication.
- Diagnose blocking, deadlocks and slow queries using **SQL Profiler traces** and **Extended Events**; troubleshoot and resolve production database issues.
- Implement **Transparent Data Encryption (TDE)** at database level and **Change Data Capture (CDC)** to track table-level data changes.
- Perform SQL Server **patching and release upgrades**; create database snapshots; manage data archiving and purging.
- Performance tuning**: rebuild indexes to remove fragmentation, optimize queries and monitor workloads.
- Security & access**: create users; grant, lock and unlock accounts; assign roles at database level.
- Author **health-check scripts**; create and monitor **SQL Server Agent** jobs; deploy database objects across dev and test environments.
- Design **database architecture**: data modeling and DB designs; create and manage tables, triggers, functions, indexes and constraints.
- Write advanced **T-SQL (DDL/DML/DRL/TCL/DCL)**: dynamic, inline and correlated sub-queries; update stored procedures with change management.
- INT HSI — AI Analyzer (current)**: Working on an AI-powered ETL project that intelligently analyzes, maps and validates incoming interface data, automating integration workflows.
- Build and maintain **SSIS ETL packages** for CCD, XML and CSV extraction, transformation and loading into healthcare production databases; develop SSRS reports.
- Execute end-to-end **data integration, migration and schema migration** across heterogeneous sources.
- Engineered **AI-agentic migration workflows** using the GPT API and automated data extraction with **Python**, cutting manual migration effort.
- As a senior team member, **lead and review database/ETL deliverables** and guide junior developers on standards and best practices.

Database Administrator Intern

Oct 2022 – Mar 2023

Systems Limited — Lahore

- Created and managed tables, triggers, functions, indexes and constraints supporting application development; contributed to data modeling and DB design.
- Developed SQL queries and reports for clients and internal departments; handled schema changes in replicated tables, backups and database migrations.

KEY PROJECTS

INT HSI — AI Analyzer — AI-driven ETL analyzer for healthcare interface data: automated analysis, mapping and validation (ongoing).

Pakistan Safe City — Built Oracle RAC cluster; migrated databases from SQL Server, MySQL and PostgreSQL to Oracle 19c.

1Link — Database installation, configuration, clustering, backup strategy and migration.

Maximus (Healthcare) — Table design, bulk data imports via SSIS, and performance monitoring for a medical health-care department.

Workey — Medical database design, stored procedure development and query handling.

Kent — Database performance monitoring and diagnostics.

AR Foot Scanner — Augmented-reality foot measurement system (Final Year Project).

LINKEDIN

linkedin.com/in/aizaz-khan

LOCATION

Lahore, Pakistan

SKILLS

Database Administration

Backup & Recovery, Always On, WFCI, HADR, Log Shipping, Replication, TDE, CDC, Security & Roles

ETL & Integration

SSIS, SSRS, CCD / XML / CSV Pipelines, Data Migration, OLAP / OLTP, Data Warehousing

Performance Tuning

Index Optimization, Query Tuning, SQL Profiler Traces, Extended Events

Development

T-SQL (DDL/DML/DCL/TCL), Dynamic & Correlated Queries, Stored Procedures, Data Modeling

Python & AI

Python Data Extraction, AI-Agentic Workflows (GPT API)

TOOLS

- SQL Server & SSMS
- Oracle 11g / 19c (RAC)
- MySQL · PostgreSQL
- MongoDB
- Databricks
- SSIS · SSRS
- Python

CERTIFICATIONS

- Microsoft DP-900: Azure Data Fundamentals
- CSS 2022 MPT Qualifier

EDUCATION

MS Data Science (In Progress)

UET Lahore · CGPA 3.45

BS Computer Science

University of Central Punjab
2018 – 2022 · CGPA 2.84

FSc Pre-Engineering

Punjab Colleges · 2016 – 2018
